A HINT OF TINT Dress up a neutral exterior for fall with splashes of color borrowed from October's wondrously warm hues. Group together gourds in a mix of both rich and understated shades to capture the full palette of the bounty in an entryway sure to entice passersby and all those you welcome in.

BOUNTIFUL GARNISH Earthy tones reminiscent of autumn's lingering greenery provide a stunning way to match seasonal embellishments to the plants that perennially adorn a porch. Pair nature's harvest with an artist's accent by intermingling real squash with faux additions. Pumpkins patterned with a leaf motif or bundled in raffia and twine nestle nicely among a handful of mossy minis and organic gourds.
